About Me

Full Stack Developer with experience designing, developing and modernizing complex web applications. I work across frontend, backend, databases and infrastructure, with a strong focus on performance, scalability, security and maintainability.

I have experience modernizing legacy systems, optimizing queries and managing the full development lifecycle, from requirements analysis through production deployment, including platforms used during high-attendance events.

I work with a range of tools and languages, including TypeScript, JavaScript, React, PHP, PostgreSQL and MySQL, using Docker, Linux and GitHub Actions to improve development and release processes. I also have a strong interest in Rust, which I explore through personal and open-source projects.

Experience

LetzFair S.r.l.

Reggio nell'Emilia (RE), Italy

Full Stack Developer

Full-time · Hybrid

December , 2023 - Present (2 years and 11 months)

Development and modernization of LetzFair's digital ecosystem, a platform for events, networking, matchmaking and ticketing. I manage applications from requirements analysis through production release, working on design, development, refactoring, query optimization and performance improvements to ensure reliability during high-attendance events.

I also contribute to infrastructure modernization, deployment automation and the development of internal tools that simplify operational processes. I use TypeScript, React, Next.js and NestJS for application development, together with PHP, PostgreSQL, Docker, Linux, AWS and GitHub Actions.

Esaedro S.r.l.

Alberi (PR), Italy

Frontend Developer

Apprenticeship · Hybrid

May , 2023 - December , 2023 (7 months)

Development of frontend interfaces for business management software aimed at SMEs, with a focus on user experience and simplifying business workflows. I contribute to feature development and data management using JavaScript, TypeScript, React and SQL.

Custom S.p.A.

Fontevivo (PR), Italy

Web Developer Specialist

Apprenticeship · On-site

March , 2023 - May , 2023 (3 months)

Development and maintenance of corporate web portals, from interface implementation to server-side functionality and data management. I also contribute to project organization and the optimization of internal processes through Jira, using HTML, CSS, PHP, JavaScript and MySQL.

M4SS S.r.l.

Reggio nell'Emilia (RE), Italy

Frontend & PHP Developer

Apprenticeship · Hybrid

May , 2022 - February , 2023 (9 months)

Development and optimization of web applications for the energy-efficiency sector and internal business management software. I work on interfaces, application features and data management, with a focus on usability, performance and maintainability. I use HTML, CSS/SCSS, JavaScript, PHP and SQL, while experimenting with Rust for performance-oriented web components.

ExtraWeb Parma S.r.l.

Parma (PR), Italy

Web Developer

Apprenticeship · On-site

August , 2021 - March , 2022 (8 months)

Development of custom WordPress websites for companies and local businesses, creating tailored themes, pages and features. I also manage content and interfaces through Elementor and WPBakery, using HTML, CSS, PHP and JavaScript.

Skills

Other Projects

folio-vitae

May , 2026 - Present (6 months)

Conception and development of folio-vitae, an open-source Rust project for generating and publishing multilingual personal websites and online CVs. I design the architecture and develop the generator, YAML-based content configuration, customizable templates, integrated web server and Docker distribution.
